	Examiner Leon Lankford	Art Unit 1651	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/4/2004 has been entered.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-34, 36-46 & 61-72 rejected under 35 U.S.C. 103(a) as being unpatentable over Mullen (5919703), Langley(5273904) and/or Scharp (5377790) in view of Kearney(5424209) and Shuler et al(5612188).

Mullen, Langley and Scharp all teach methods of isolating islets from a pancreas including all of the culture/digestion steps claimed by applicant. The references do not teach using controllers to control all the experimental parameters of the process,

Art Unit: 1651

however at the time the invention was made, it would have been obvious to control all the experimental parameters of an islet isolating process because the three references clearly teach that these parameters are result effective variables and would be routinely optimized by one of ordinary skill in the art at the time the invention was made. It would further have been obvious to use automated/computerized controllers to control the experimental parameters because the state of the art clearly uses such means to do so. For example, Kearney and Shuler teach automated cell culture/handling processes in which controllers are programmed to sense and optimize the growth/maintenance of the culture. Applicant's claims are still broad and vague, essentially claiming the automated control of a process wherein the parameters that need to be controlled are all recognized and the means for controlling them are all old and well known in the art.

Accordingly, the claimed invention was prima facie obvious to one of ordinary skill in the art at the time the invention was made especially in the absence of evidence to the contrary.
